DETAILED ACTION

An amendment has been received which canceled claims 1-7 and added claims 8-17. According claims 8-17 will be examined on their merits.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 1. Claims 16-17 are rejected under 35 USC 101 as the claimed invention is directed to non-statutory subject matter. For a claim to be statutory under 35 USC 101 the following two conditions must be met:
- 1) In the claim, the practical application of an algorithm or idea results in a useful, concrete, tangible result,

AND

2) The claim provides a limitation in the technological arts that enables a useful, concrete, tangible result.

As to the technology requirement, note MPEP Section IV 2(b). Also note In re Waldbaum, 173USPQ 430 (CCPA 1972) which teaches "useful arts" is synonymous with "technological arts". In Musgrave, 167USPQ 280 (CCPA 1970), In re Johnston, 183USPQ 172 (CCPA 1974), and In re Toma, 197USPQ 852 (CCPA 1978), all teach a technological requirement.

The invention in the body of the claim must recite technology. If the invention in the body of the claim is not tied to technological art, environment, or machine, the claim is not statutory. Ex parte Bowman 61USPQ2d 1665, 1671 (BD. Pat. App. & Inter. 2001) (Unpublished).

Claim Rejections - 35 USC § 103

Application/Control Number: 09/662,588

Art Unit: 3628

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 3

2. Claims 8-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kalmus et al (US 4,674,044).

Kalmus discloses (see columns 1-12) all the steps, methods, and system as described within claims 8-17, including both a system of a processor configured to, and a method for, dynamically create sets of class components to handle one or more transactions with each set of class components further comprising; a first component comprising functions for sending messages and receiving messages to the system on behalf of a customer, a second component comprising functions for controlling access to the system by the customer, a third component comprising functions for sending messages to and receiving messages from the first component and a trader, wherein the third component operates in either a synchronous or asynchronous format and can handle either one or multiple customers or transactions at one time, and where each component is created in response to a customer accessing the system. Kalmus uses different words to describe the applicant's invention.

3. Kalmus taught, in 1985, a generic method and system for a computer automated securities trading system which was specifically designed to execute all the functions and features described in claims 8-17. Because it was a pioneering invention it would have been obvious to one skilled in the art to have been fully aware of Kalmus' teachings and to have used his invention to practice applicant's invention prior to applicant's filing date.

Art Unit: 3628

4. Note is taken by the examiner that should the applicant find objectionable any statements made herein by the examiner regarding obviousness or Official Notice, Applicant can make a proper challenge to those statements only by providing adequate information or argument so that on its face it creates a reasonable doubt regarding the circumstances justifying those statements: a simple response requesting a reference without doing so, or a response that fails to logically refute the basic assumptions underlying the justification, will result in an improper and failed challenge and those unchallenged statements will remain the record of the case. Applicants must seasonably challenge those statements in the first response following an Office Action. If an applicant fails to do so, his right to challenge them is waived.

Page 4

Response to Applicant's Arguments

- **5.** Applicant has stated that all prior rejections are moot in light of the fact that all prior claims rejected were canceled, therefor there are no arguments to address.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Fults whose telephone number is 703-305-5416. The examiner can normally be reached on weekdays from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung Sough, can be reached on (703)-305-0505. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
